

EU regulation for new cars takes effect in winter update

## When converting new cars to winter tyres, it is now usually mandatory to install tyre pressure sensors!

When converting new cars to winter tyres, it is now usually mandatory to install tyre pressure sensors!

For new vehicles registered for the first time since 1 November 2014, the new EU Regulation (No. 661/2009) requires a tire pressure monitoring system (TPM). If this is a measuring system (in contrast to systems that calculate the tyre pressure indirectly via the rolling circumference of the tyres), the winter tyres must also be equipped with measuring sensors.

### The alternative:

#### AIC introduces tire pressure sensors

With 21 articles, this new product group serves over 1000 vehicle types right from the start. AIC tire pressure sensors can be used immediately without any further changes or settings, i.e. they are "Plug&Play" capable.

To ensure this capability, the installation of the entire product range of these new sensors was tested in conjunction with an experienced workshop.
