Test results raise the calculated contribution of reaction product from alkylthioalcohol and a substituted phosphorus compound (EG 424-820-7), as this substance is part of a tested Alkyl phosphite mixture "is. Acute and chronic water tests using the "alkyl phosphite mixture" were carried out lead to a classification of Acute Aquatic 3. The classification of the Product is then determined using the classification (Acute Aquatic 3) and the wt% of the "Alkyl phosphite mixture" as well as the classification and% by weight of the other substances with an im Product calculated according to existing aquatic classification.
