In relation to ClutchPro Clutch Kit KFD25009

Correct Fork and Release Bearing Identification
Ford VH Transit 2.4L Turbo Diesel 04/02 - 03/04

It is important when checking part suitability that you match the clutch fork with the release bearing. The release bearing and fork in the VH Ford Transit models from 03/00-03/04 are interchangeable and incorrect parts will affect the performance of the clutch.

The fork that suits the release bearing in this kit should be flat where the release bearing fits.

The release bearing in this kit has a raised section where the bearing pivots. ClutchPro has the replacement release forks ATFFD17 available to suit this model
