**In relation to ClutchPro Clutch Kit KFD25008**

**Correct Fork and Release Bearing Identification**  
 Ford VH Transit 2.4L Turbo Diesel 03/00 - 04/02

It is important when checking part suitability that you match the clutch fork with the release bearing. The release bearing and fork in the VH Ford Transit models from 03/00-03/04 are interchangeable and incorrect parts will affect the performance of the clutch.

The fork that suits the release bearing in this kit should be raised where the release bearing pivots.

The release bearing in this kit is flat where the bearing fits to the release fork.

ClutchPro has the replacement release forks ATFFD18 available to suit this model.
