# THE NEW ALUMINIUM CARRIER SYSTEM

## For vehicle models with roof railings

The new aluminium carrier system is the perfect supplement to your roof box. Thanks to the different lengths of the load bars, the mounting system can be easily combined with many vehicle models. Your car simply has to have a corresponding roof rail feature. In addition, roof boxes can be mounted with innovative ClickFix fitting systems without additional mounting accessories on the carrier.

**Load bars type 1**  
2 pieces, made of aluminium  
Max. Load: 100 kg  
Load bar dimensions (L x W): 1050 x 68 mm

**0 47105 07**

*In the case of roof box attachments with sliding adapters, two special rubber cover sections ensure especially fast, convenient mounting on the aluminium carrier. Here the rubber cover sections do not have to be adjusted specially or cut to size as is customary with other carrier systems.*

**Load bars type 2**  
2 pieces, made of aluminium  
Max. Load: 100 kg  
Load bar dimensions (L x W): 1150 x 68 mm

**0 47115 07**

*Important: in the case of roof boxes without ClickFix fitting systems, sliding adapters or U-Bolts may be needed for attachment to the carrier system.*

**Load bars type 3**  
2 pieces, made of aluminium  
Max. Load: 100 kg  
Load bar dimensions (L x W): 1250 x 68 mm

**0 47125 07**

**Load bars type 4**  
2 pieces, made of aluminium  
Max. Load: 100 kg  
Load bar dimensions (L x W): 1350 x 68 mm

**0 47135 07**

**Roof rail foot set**  
4 pieces, lockable  
Max. Load: 100 kg  
For aluminium carrier systems  
with load bar types 1-4

**0 47010 01**

Please consult our vehicle type list for the respective compatibility of the individual carrier systems.
